NATURAL “GREEN” BURIAL SERVICES

We are one of a select number of funeral homes meeting the criteria for providing natural burial by the Green Burial Council; a tax-exempt, nonprofit organization promoting environmental sustainability in death care. These offerings allow for a funeral to take place without the use of toxic or nonbiodegradable materials/chemicals. Caskets and shrouds are made available to enclose and transport the dead. Body preparation for a “green” burial consists of refrigeration, topical sprays/compounds, or arterial embalming with non-toxic, essential oils. Home wakes, public visitations, church funerals & graveside services are options to be chosen within the period that a “green” funeral allows. This price list presents services and merchandise that may be selected relating to a natural burial.

PACKAGED SERVICE FORMATS

For convenience our most frequently selected services are packed into easy-to-understand groupings that include the combined items from page 1, relevant to each particular service below. The total fee for services may actually vary depending upon additions or deletions. Your funeral director will quote total services based on charges for each item selected. Outer Burial Container Price List

January 1, 2018

In most areas of the country, state or local law does not require that you buy a container to surround the casket in the grave. However, many cemeteries require that you have such a container so that the ground will not sink in. Either a grave liner or burial vault will satisfy these requirements.
